- Fever (37.5 degrees or more) and respiratory symptoms (cough, sputum, etc.)
- Have traveled to Hubei Province or Been in contact with a person who has traveled to Hubei Province and has a fever and respiratory symptoms

Those who apply to both... **Please call us before consulting a medical institution!**

«Habits to protect yourself and others»

○ Frequently wash your hands with running water and soap.

*Especially after you go out and after you sneeze before you touch your mouth, nose, eyes etc.

○ If you cough, wear a mask or cover your nose with a tissue and perform cough etiquette to prevent infecting the people around you.
